Parameters

SPECIFICATION		
Item	**P8**	**P10**
Pixel pitch	8 mm	10 mm
LED type	SMD	
Pixel density	15625 pixels/m2	10000 pixels/m2
Pixel conÞguration	1R1G1B full color	
LED module size	320x160mm	320x160mm
LED module resolution	40x20	32x16
Cabinet dimension	960x960mm/ Customized	
Cabinet weight	65KG/m2	
Cabinet material	Steel/ Aluminum	
Brightness	5500 ~ 6500	
Refresh rate	3840Hz	
Gray scale	14~16	
Colour temperature	6500~9300	
View angle	H140°/ V140°	
Contrast ratio	4000 : 1	
Power supply	100~240V	
Storage temp	-30C ~ +60C	
Operation temp	-30C ~ +60C	
Operation humidity	10% ~ 90%	
Input signal	DVI / VGA，RGBHV，Composite Video signal，S-VIDEO，YPbPr(HDTV)	
IP rating(Front and rear)	IP65/ IP54	
Max. Power consumption	900W/m2	
Avg. Power consumption	320W/m2

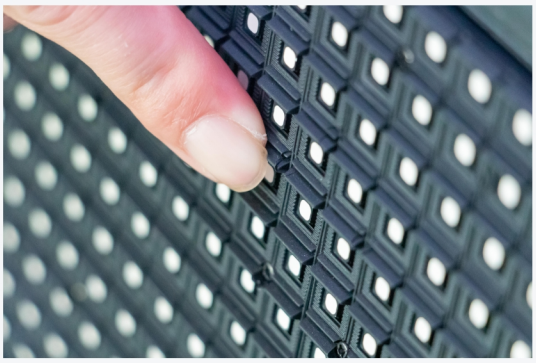
Football Club Perimeter Advertising LED Screen

The perimeter LED display is used in stadium fencing advertising, and an information display can display any length of strip advertising. Each LED cabinet has individual support legs for independent support behind the cabinet, and the soft mask and top impact cushion prevent sportspeople from hitting the LED screen.

Features

- Soft mask
- Top protect rubber
- Adjustable back support
- Ip67 water-proof
- High refresh rate
- Solidly-built architecture

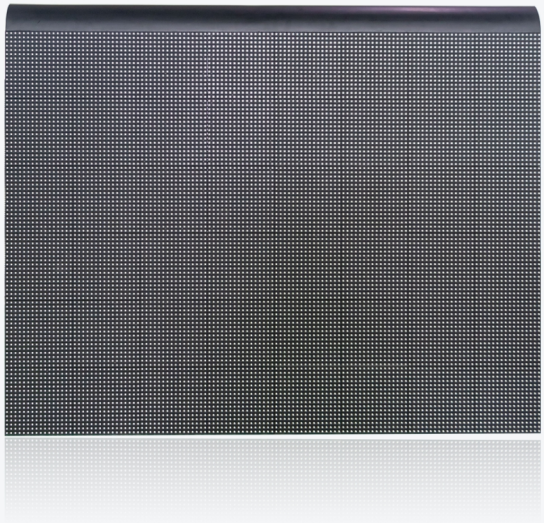


Soft mask

Considering the speed and impact of the players, we use a soft mask cover on the surface of the LED display to protect the players.

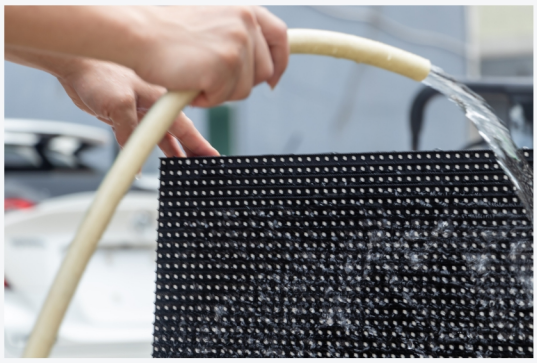
Top protect rubber

Top protect rubber to protect the players just in case if the players hit the LED screen.



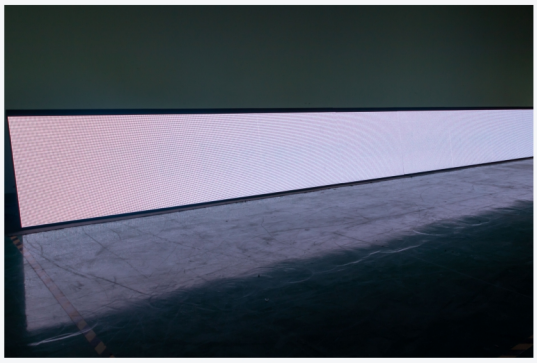
Adjustable back support

Each LED cabinet has the back support, it is able to support without any structure on the ground, adjustable support angle to make sure it has wide view angle.



Water proof

Perimeter LED screen with IP65 rating can work under any harsh weather.



High refresh rate

Refresh rate of 3840hz enable the high-speed camera to capture any image of the LED display without appearing any scanning line.

Perimeter fencing LED Screen FS

Solidly-built architecture

High quality metal cabinet with unique thickness and weight design ensures that every event can be played securely on the court.
